Professional Summary

Computer Science undergraduate with strong foundations in Data Structures and Algorithms (DSA), Full-Stack Development, and Machine Learning. Experienced in building scalable web applications using Flask, React, SQL, and REST APIs, along with developing AI-powered solutions using Python and Scikit-learn. Passionate about solving real-world problems through clean, efficient code and continuously learning emerging technologies.

Projects

- **MediLink – Healthcare Management Platform** [Source code]

  Flask, *SQLAlchemy*, *SQLite, HTML, CSS, JavaScript, Flask-Login, Flask-Mail, Chart.js*

  - Developed a full-stack healthcare management platform supporting **Patients, Doctors, Hospitals, and Admin** through role-based authentication and authorization.
  - Built modules for appointment scheduling, patient profiles, doctor management, hospital dashboards, and medical record management.
  - Implemented interactive analytics dashboards using **Chart.js** to visualize appointment statistics and platform insights.
  - Integrated automated email notifications for appointment confirmations, status updates, and prescription uploads using **Flask-Mail**.
  - Designed a scalable backend architecture using **Flask Blueprints**, **SQLAlchemy ORM**, and RESTful design principles.

- **Agri-Tech Decision Support System** [Source code]

  Python, Flask, React.js, Scikit-learn, NumPy, Pandas, Chart.js

  - Developed a full-stack **AI-powered precision agriculture platform** that provides crop recommendations, fertilizer suggestions, soil health analysis, irrigation guidance, disease risk prediction, and profit estimation.
  - Trained and deployed **Random Forest** machine learning models using Scikit-learn and exposed predictions through RESTful Flask APIs.
  - Engineered a responsive React.js dashboard with interactive visualizations using Chart.js, enabling users to make data-driven farming decisions.
  - Applied data preprocessing and feature engineering with Pandas and NumPy to improve prediction quality and overall system performance.

Skills

Programming Languages: C / C++ , Python, JavaScript, Go (Learning)
Frontend: HTML, CSS, React.js, Tailwind CSS.
Backend: Flask, Node.js, Express.js.
Database: MySQL, SQLite, MongoDB
Machine Learning & Data Science: Scikit-learn, NumPy, Pandas, Matplotlib
Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook
Core Concepts: OOPS, OS, DBMS, Data Structures and Algorithms (DSA), Computer Networks (CN), REST APIs, JWT Authentication

Education

M S Ramaiah University of Applied Sciences, Bengaluru 2024 - 28
BE in Artificial Intelligence & Machine Learning Science CGPA – 8.3

BGS PU College 2022 - 24
PUC Percentage – 94.8

Certification

- Introduction to Python – Infosys Springboard
- Machine Learning Beginner – Infosys Springboard

Other Activities

- Solved 200+ Data Structures & Algorithms problems on LeetCode.
- Completed **Striver's A2Z DSA Sheet**, covering Graphs, Dynamic Programming, Trees, and core algorithms.
- Continuously learning Go, Full-Stack Development, and Machine Learning through hands-on projects.
